**Sinopsis**

**ISBN:** 9781785609442

At least since the 1950s, rising income differences between rich and poor nations began to wane as poorer nations started to catch up to richer ones, but inequality within many countries rose. Not only have the rich been getting richer since the 1980s, but this trend of rising inequality holds true for most countries. Growing inequality within countries is becoming one of the biggest concerns facing the world economy
