Sinopsis

ISBN: 9780763710798

Object-Oriented Data Structures Using Java teaches the classic data structures with an informal, yet rigorous, approach; it includes the appropriate object-oriented concepts and makes use of the appropriate Java constructs. The textbook is designed for students who have already taken one semester of computer science and are able to handle a problem of medium complexity, write an algorithm to solve the problem, code the algorithm in a programming language, and demonstrate the correctness of their solution. The focus is on teaching computer science principles with chapter concepts being reinforced by case studies.
