**ISBN:** 9780486215310

"Human history becomes more and more a race between education and catastrophe," H. G. Wells once said. Widely revered as the father of science fiction, the English novelist, journalist, sociologist, and historian penned ominous -- and educated -- glimpses at humanity's possible future, including *The Time Machine* (1895), *The Invisible Man* (1897), and *The War of the Worlds* (1898).
