Sinopsis

ISBN: 9780071216845

The ninth edition of this classic text has been entrusted into the capable hands of a dynamic new author team. Eric Widmaier, Hershel Raff, and Kevin Strang have taken on the challenge of maintaining the strengths and reputation that have long been the hallmark of Human Physiology: The Mechanisms of Body Function. The fundamental purpose of this textbook has remained undeniably the same: to present the principles and facts of human physiology in a format that is suitable for undergraduates regardless of academic background or field of study. Human Physiology, ninth edition, carries on the tradition of clarity and accuracy, while refining and updating the content to meet the needs of today's instructors and students. The ninth edition features a streamlined, clinically oriented focus to the study of human body systems.
