Sinopsis

ISBN: 9781405126762

Credit Derivatives is the first student-oriented text to explain this field to business students with a background in finance. Real-world examples are cited throughout, reinforced by end-of-chapter questions, and students can take advantage of links to pricing models on the internet. This concise book is ideal for instructors seeking to supplement traditional derivatives course material, as well as those looking to enhance their own understanding of this fast-growing area.
