Sinopsis

ISBN: 9780300112962

In 1946 Ove Arup, a leading engineer of the twentieth century, founded a firm of consulting engineers that brought to fruition such iconic structures as the Sydney Opera House, the Olympic Village in Beijing, London's Millennium Bridge, the Beaubourg Centre in Paris, the Channel Tunnel Rail Link, and Kansai Airport in Japan among many others. Devoted to a "commonsense" reform of engineering and architectural practice, Arup (1895-1988) pioneered the way for modern architects and engineers to collaborate successfully and responsibly on large projects. This is the first biography of the great and versatile engineer, complete with some 80 historic photographs that have never been published before.
