"This book provides a great wealth of the most current information for today's readers and will serve as a respected resource for decades to come...a treasure trove of knowledge."- James B. Snow, Jr., Professor Emeritus, University of Pennsylvania School of Medicine, and Former Director, National Institute on Deafness and Other Communication Disorders, National Institutes of Health (from the foreword) Written by distinguished scientist-clinicians who have made pioneering contributions in the fields of otolaryngology, rheumatology, and immunology, this resource presents critical information on a multitude of diseases that have manifestations in the head and neck and relates commonly encountered head and neck symptoms and signs to an array of diseases and disorders that should be considered in the differential diagnosis. Offering a hands-on approach, this source is divided into two sections to address specific disease classifications and commonly encountered signs and symptoms in the head and neck region_offers a clinical approach to disease diagnosis by analyzing the possible causes of a patient's symptoms_presents evidence-based therapeutic options for a variety of conditions, from infections and rheumatologic conditions to hematologic and neoplastic disease_offers a variety of lucid color photographs_is organized by disease type for easy reference_provides a unique reference for clinicians who manage diseases which have symptoms in this region.
