Sinopsis

ISBN: 9781593701390

In this new edition, author Leonard Kalfayan has updated his 2001 book on acid stimulation, one of the primary methods for improving productivity of oil, gas, injection, and disposal wells. Because a properly designed and executed acid job can improve cash flow, oil company and service company staff can use this text to help improve profits. Kalfayan offers practical guidelines for acid treatment design by stressing a systematic approach to candidate selection and treatment design, as well as execution and evaluation to improve profits and productivity.
