Sinopsis

ISBN: 9781557987587

Examining the relationship between body image and eating disorders in children and youth, 14 chapters contributed by 27 American specialists present current research, assessment techniques, and suggestions for treatment and prevention. Specific topics include early experiences with food and eating, child sexual abuse, risk and protective factors, plastic surgery in children and youth, and considerations in working with an ethnically-diverse patient population. The book is intended for researchers, practitioners and clinicians, but is also accessible to general readers concerned about this trend. Editors Thompson (psychology, U. of S. Florida) and Smolak (psychology/women's and gender studies, Kenyon College) have each previously published extensively on the topic of eating disorders.
