Sinopsis

ISBN: 9781590598610

Flash is one of the most engaging and innovative, and versatile technologies available allowing the creation of pretty much anything from simple slideshows, animated banners and icons and cartoons, to Rich Internet Applications, Interactive videos, and dynamic user interfaces for web sites, kiosks, or DVDs. The possibilities are endless, except that now, it just got better.

In 2007, Adobe released Flash CS3, which boasts a whole host of new features, including fully customizable workspace, full ActionScript 3.0 support, a PSD importer, a tween-to-code animation converter, and much more.

And this book is all you'll need to learn Flash CS3 from the ground up, or learn about all these new features, if you already have previous Flash experience_Flash experts Tom Green and David Stiller take you step-by-step through all facets of Flash CS3, with the emphasis firmly on good design techniques that you use in your own projects.
