Based on award-winning scientist Marc Bekoff's years studying social communication in a wide range of species, this important book shows that animals have rich emotional lives. Bekoff skillfully blends extraordinary stories of animal joy, empathy, grief, embarrassment, anger, and love with the latest scientific research confirming the existence of emotions that common sense and experience have long implied. Filled with Bekoff's light humor and touching stories, *The Emotional Lives of Animals* is a clarion call for reassessing both how we view animals and how we treat them.
