Sinopsis

ISBN: 9780321508928

The LATEX typesetting system remains a popular choice for typesetting a wide variety of documents, from papers, journal articles, and presentations, to books--especially those that include technical text or demand high-quality composition. This book is the most comprehensive guide to making illustrations in LATEX documents, and it has been completely revised and expanded to include the latest developments in LATEX graphics. The authors describe the most widely used packages and provide hundreds of solutions to the most commonly encountered LATEX illustration problems.
