The Landscape of Qualitative Research, Third Edition attempts to put the field of qualitative research in context. Part I provides background on the field, starting with history, then action research and the academy, and the politics and ethics of qualitative research. Part II isolates what we regard as the major historical and contemporary paradigms now structuring and influencing qualitative research in the human disciplines. The chapters move from competing paradigms (positivist, post positivist, constructivist, critical theory) to specific interpretive perspectives, feminisms, racialized discourses, cultural studies, sexualities, and queer theory. Part III considers the future of qualitative research.
