This volume examines continuities and change in the normative underpinnings of both ancient and modern practices of political governance, public duties, private virtues, and personal rights and responsibilities. As such, it stands at the multi-disciplinary intersection between the practice of democratic citizenship and the exercise of political ethics. Interlinked chapters address law and morality in history, from Ancient Mesopotamia and Enlightenment Europe to modern America; the new millennium's scientific and technological transformations; evolving links among different systems of belief; and complex ethical issues in domestic and international democratic governance, in varying contexts, across today's globalizing world.
