In the most comprehensive account of this legendary island, Frank Joseph provides compelling evidence that Atlantis was at the root of all subsequent human civilizations. Brilliantly refuting years of modern skepticism, Joseph combines evidence from archaeology, geology, astronomy, and ancient lore to locate Atlantis in the context of Near Eastern Bronze Age society at the end of the 13th century B.C. The author seamlessly combines hard scientific evidence with a stunning imaginative re-creation of what it must have been like to walk the streets of Atlantis in its last days. The resulting portrait of a mighty empire corrupted by an overreaching lust for wealth and power offers an important lesson to our own materialistic civilization poised on the brink of ecological disaster.
