The emerging metropolitan regional-equity movement promotes innovative policies to ensure that all communities in a metropolitan region share resources and opportunities equally. Too often, low-income communities and communities of color bear a disproportionate burden of pollution and lack access to basic infrastructure and job opportunities. The metropolitan regional-equity movement_sometimes referred to as a new civil rights movement_works for solutions to these problems that take into account entire metropolitan regions: the inner-city core, the suburbs, and exurban areas. This book describes current efforts to create sustainable communities with attention to the "triple bottom line"_economy, environment, and equity_and argues that these three interests are mutually reinforcing.
