Sinopsis

ISBN: 9780275994969

Willis synthesizes the research literature on the American media, focusing primarily on the question of how media representations influence government decision-making, particularly the decision to go to war. He discusses how the media chooses what to cover and the media's ability or inability to cover stories accurately. He also discusses questions of media literacy, the symbiotic relationship between politicians and the media, and examples of how presidents have sought to manage media coverage throughout American history."-Reference & Research Book News
