Dubbed "America's Favorite Home Architect" by Fine Homebuilding magazine, where her "Drawing Board" column appears, Susanka here presents a small compilation of 31 essays from the column that offer a number of solutions to household design problems both big and small. Throughout, she stresses the importance of practical designs that increase a home's aesthetic appeal and allow homeowners to use their houses in the most efficient way. Susanka offers an eclectic mix: tips on site selection, mud room design, planning to fit specific furniture, creating a family room that works, personalizing with tile, and planning window seats, pantries, TV placement, and floor plan changes. Most of the projects are major undertakings, but several could be done inexpensively. Certainly, most homeowners could find something in this title to increase their enjoyment of their home. Susanka's previous two books have sold over half a million copies, so there's sure to be reader interest in this title.
