Sinopsis

ISBN: 9780521479486

This book brings together leading figures who have made key contributions to the development of international theory to provide a major survey of the state of the subject. The contributors analyze the traditional theoretical approaches in the discipline, the issues and groups that are marginalized by mainstream theory, and important new developments in international theory. The book concludes with five chapters that look at the future of the subject. This volume will be a valuable text for both students and scholars of international relations.
