Is it true that the Social Security system is in serious trouble and must be repaired? As baby boomers begin to retire, will they inevitably, by force of their sheer numbers, bankrupt the system? Is Social Security a big Ponzi scheme that will leave future generations with little to show for their lifetime of contributions? Is the only way to solve the Social Security crisis through radical changes like privatization or bolstering it with massive new taxes?

According to the authors of this important new study, the answer to these questions is a resounding no. In *Social Security: The Phony Crisis*, economists Dean Baker and Mark Weisbrot argue that there is no economic, demographic, or actuarial basis for the widespread belief that the program needs to be fixed.

As the authors emphasize, there is virtually no disagreement about the facts of Social Security's finances, or even the projections for its future. Rather, the Social Security debate has been foundering on misconceptions, confusion, and lack of agreement on the meaning of crucial terms.

The authors also take on related issues: that privatization would help save Social Security, that America has a pressing need to increase its national savings, and that future generations will suffer from the costs\_especially for health care\_of supporting a growing elderly population.

Foreword

Acknowledgments

Chapter 1: Introduction

Social Security and Social Insurance

The Politics of Non-Issues

Chapter 2: Social Security and its Critics

Social Security's Finances

The Disappearing Trust Fund

Demography as Destiny  
Unfunded Liabilities, Ponzi Schemes, and Other Rhetorical Devices  
Chapter 3: Generating Phony Wars With Generational Accounting  
How Generational Accounting Works  
How Generational Accounting Cooks the Books  
Discounting Our Children's Futures  
Will Education Really Impoverish Our Children?  
If Health Care Costs Destroy the Economy, What Will Happen to Tax Rates?  
What the Recount Shows  
How Will Our Children Really Fare?  
Rising Incomes, Changing Demographics  
The Base Case  
What the Real Generational Accounts Show  
Chapter 4: Entitlements for the Elderly: Medicare "Reform"  
The Wrong Direction  
The Wrong Incentives  
Medicare and Health Care Reform  
Chapter 5: The Debate Over the Consumer Price Index  
What Difference Does 1.1 Percent Make?  
The Boskin Arithmetic  
The Evidence for an Overstated CPI  
Substitution Bias  
Retail Outlet Substitution Bias  
Quality and New Goods Bias  
Sources of Understated Inflation in the CPI  
Inflation for Whom?  
The Implications of an Overstated CPI  
The Boskin Commission's Failed Case  
Chapter 6: The Glories of Privatization  
A Happy Market, an Unhappy Economy  
Is There a Way to Beat 3.5 Percent?  
The Returns From Privatization: Going Down From 3.5 Percent  
A Modicum of Privatization  
Chapter 7: The Advisory Council and Other Fixes  
Three Ideas From the Advisory Council  
Investing the Trust Fund  
Other Regressive Cuts
