Sinopsis

ISBN: 9780415253840

The great physicist's own explanation of relativity, written for readers unfamiliar with theoretical physics, outlines the special and general theories and presents the ideas in their simplest, most intelligible form.

ALBERT EINSTEIN (1879_1955) was a German-born theoretical physicist who is widely considered one of the greatest physicists of all time. While best known for the theory of relativity, he was awarded the 1921 Nobel Prize in Physics for his explanation of the photoelectric effect and "for his services to Theoretical Physics." Einstein was named Time magazine's "Man of the Century."
