Sinopsis

ISBN: 9780821848036

This volume contains invited lectures and selected contributions from the International Workshop on Orthogonal Polynomials and Approximation Theory, held at Universidad Carlos III de Madrid on September 8-12, 2008, and which honored Guillermo López Lagomasino on his 60th birthday.

This book presents the state of the art in the theory of Orthogonal Polynomials and Rational Approximation with a special emphasis on their applications in random matrices, integrable systems, and numerical quadrature. New results and methods are presented in the papers as well as a careful choice of open problems, which can foster interest in research in these mathematical areas. This volume also includes a brief account of the scientific contributions by Guillermo López Lagomasino.

Readership

Graduate students and research mathematicians interested in orthogonal polynomials, approximation theory, and their applications.

Table of Contents

- F. Marcellán and A. Martínez-Finkelshtein -- Guillermo López Lagomasino: mathematical life
- B. de la Calle Ysern -- A walk through approximation theory
- L. Baratchart and M. Yattselev -- Asymptotic uniqueness of best rational approximants to complex Cauchy transforms in \$L^2\$ of the circle
- L. Garza and F. Marcellán -- Quadrature rules on the unit circle. A survey.
- A. Iñort, P. Linares, and J. G. Llavona -- On the multilinear trigonometric problem of moments
- A. B. J. Kuijlaars -- Multiple orthogonal polynomial ensembles
- E. Levin and D. S. Lubinsky -- Some equivalent formulations of universality limits in the bulk
- A. López García -- Greedy energy points with external fields
- A. Martínez-Finkelshtein and E. A. Rakhmanov -- On asymptotic behavior of Heine-Stieltjes and
