Sinopsis

ISBN: 9781559635585

With illustrative and detailed examples drawn from throughout the country, Green Infrastructure advances smart land conservation: large scale thinking and integrated action to plan, protect and manage our natural and restored lands. From the individual parcel to the multi-state region, Green Infrastructure helps each of us look at the landscape in relation to the many uses it could serve, for nature and people, and determine which use makes the most sense.

In this wide-ranging primer, leading experts in the field provide a detailed how-to for planners, designers, landscape architects, and citizen activists.

Biographies

Mark Benedict is the Senior Associate for Strategic Conservation and the Senior Advisor for the Conservation Leadership Network at the Conservation Fund. He has his Ph.D. in botany/plant ecology from the University of Massachusetts, Amherst.

Ed McMahon is vice president and director of land use planning for The Conservation Fund and co-author of *Balancing Nature and Commerce in Gateway Communities* (Island Press 1997).

The Conservation Fund, a national nonprofit organization, acts to protect the nation's legacy of land and water resources in partnership with other organizations, public agencies, foundations, corporations, and individuals. Since its founding in 1985, the Fund has helped its partners safeguard wildlife habitat, working landscapes, community greenspace and historic sites totaling more than 3.4 million acres throughout the nation. Its headquarters are in Arlington, Virginia.
