Sinopsis

ISBN: 9786074428568

Written in the same format as Chemistry 1, this is the second volume of the bunch of chemistry notes that were specifically designed and converted into a book to introduce the basic essentials of goog high school chemistry course.

While chemistry is a challenging subject, it is also understandable and vital. Therefore, abstract chemical theories with their rigorous mathemastical requirements have been omitted in order to present only the accurate, concise and effective principles of chemistry in contexts familiar to the students.
