**Sinopsis**

**ISBN:** 9781845641801

Containing papers presented at the Seventh World Conference on Earthquake Resistance and Engineering Structures (May 11-13, 2009, Cyprus), this book will be invaluable to engineers, scientists and managers working in industry, academia, research organizations and governments. The book is organized into the following sections: Earthquake resistant design; Seismic behaviour and vulnerability; Structural dynamics; Passive protection devices; Seismic isolation; Site effects and geotechnical aspects; Development and application of passive anti-seismic systems (Special session chaired by A. Martelli); Bridges; Lifelines; Material characterisation; Experimental studies; Numerical simulation.
