Sinopsis

ISBN: 9810201133

The f2-particle coefficients of fractional parentage for the group chain $SU(mn) \supset SU(m) \times SU(n)$ or $U(mn) \supset U(m) \times U(n)$, with arbitrary m and n and with as many as possible symmetries, are tabulated for systems with up to six particles and for f_2 equal up to three. All the coefficients are in the form of square roots of simple fractions. The algorithm for the CPF as well as the symmetries of the CFP are discussed.
