Sinopsis

ISBN: 9780387370293

Celebrates the contributions which Melvyn B. Nathanson has made to additive number theory

Provides a current view of the state-of-the-art in the field of additive number theory

Includes contributions to various areas of number theory by top researchers in the field

This impressive volume is dedicated to Mel Nathanson, a leading authoritative expert for several decades in the area of combinatorial and additive number theory. Nathanson's numerous results have been widely published in top notch journals and in a number of excellent graduate textbooks (GTM Springer) and reference works. For several decades, Mel Nathanson's seminal ideas and results in combinatorial and additive number theory have influenced graduate students and researchers alike. The invited survey articles in this volume reflect the work of distinguished mathematicians in number theory, and represent a wide range of important topics in current research.
