Sinopsis

ISBN: 9780439027052

Budding researchers and the just-plain-curious can take a fascinating journey as they investigate a few of their favorite subjects through striking color photographs and straightforward, fact-filled text. This exciting series of easy-to-read books, written with the help of a reading expert, is especially for children who are beginning to read on their own.

Young children are fascinated by the huge machines they see every day on building sites or at road-works. Their curiosity about how they work and what each part does, is satisfied here, amongst large, bright illustrations of diggers and cranes.
