Sinopsis

ISBN: 9789380250175

For the past fifty years, C.S. Seshadri has been a towering figure in the mathematical world, and his contributions have been central to the development of moduli problems and geometric invariant theory as well as representation theory of algebraic groups. These two volumes of his collected papers have been organized in accordance with the subject matter, faithfully reflecting the diversity of his mathematical contributions.

These volumes will inspire future generations of mathematicians and provide insights into the unique mathematical personality of C.S. Seshadri.
