Sinopsis

ISBN:

" I hope this book will met a real need, for when one considers how prevalent epilepsy, hysteria and neurasthenia are, among all ranks and ages of both sexes, it seems remarkable some such popular book was not written long ago.

I add nothing out to our knowledge of these ills, my object being to put what we know into simple words, and to insist on the necessary for personal discipline being allied to expert aid. The book aims at helping , not ousting, the doctor, who may find it of use in getting his patient to see- and to at on- the obvious." I. G. Briggs
