Sinopsis

ISBN: 9783540642435

This softcover reprint of the 1974 English translation of the first three chapters of Bourbaki's Algebre gives a thorough exposition of the fundamentals of general, linear, and multilinear algebra. The first chapter introduces the basic objects, such as groups and rings. The second chapter studies the properties of modules and linear maps, and the third chapter discusses algebras, especially tensor algebras.
