Sinopsis

ISBN: 9780486425153

A number of geometric constructions are impossible to complete with just a ruler and a compass. This book discusses the most famous of these "impossible" constructions. Part I explores ground rules, history, and angle trisection. Part II treats nonconstructible regular polygons and the algebra associated with them. 1970 edition.

Reprint of Ruler and the Round: or Angle Trisection and Circle Division, Prindle, Weber & Schmidt, Inc., Boston, 1970.
