**ISBN:** 9780821891421

This volume contains papers based on lectures given at the 12th International Conference on  $p$ -adic Functional Analysis, which was held at the University of Manitoba on July 2-6, 2012.

The articles included in this book feature recent developments in various areas of non-archimedean analysis: branched values and zeros of the derivative of a  $p$ -adic meromorphic function,  $p$ -adic meromorphic functions  $f \in P'(f), g \in P'(g)$  sharing a small function, properties of composition of analytic functions, partial fractional differentiability, morphisms between ultrametric Banach algebras of continuous functions and maximal ideals of finite dimension, the  $p$ -adic  $q$ -distributions, Banach spaces over fields with an infinite rank valuation, Grobman-Hartman theorems for diffeomorphisms of Banach spaces over valued fields, integral representations of continuous linear maps on  $p$ -adic spaces of continuous functions, non-Archimedean operator algebras, generalized Keller spaces over valued fields, proper multiplications on the completion of a totally ordered abelian group, the Grothendieck approximation theory in non-Archimedean functional analysis, generalized power series spaces, measure theory and the study of power series and analytic functions on the Levi-Civita fields.

Through a combination of new research articles and survey papers, this book provides the reader with an overview of current developments and techniques in non-archimedean analysis as well as a broad knowledge of some of the sub-areas of this exciting and fast-developing research area.

**Readership**

Graduate students and researchers interested in non-archimedean analysis and related topics.

**Table of Contents**

M. Berz and S. Troncoso -- Affine invariant measures in Levi-Civita vector spaces and Erdős obtuse angle theorem

Teléfonos: 55 44 73 40 y 55 44 72 91

*Librería*  
*Bonilla y Asociados*  
*desde 1950*

- J.-P. Bézivin, K. Boussaf, and A. Escassut -- Some old and new results on zeros of the derivative of a  $p$ -adic meromorphic function
- K. Boussaf, A. Escassut, and J. Ojeda -- Survey on  $p$ -adic meromorphic functions  $f \in P'(f), g \in P'(g)$  sharing a small function and additional properties
- B. Diarra -- The  $p$ -adic  $q$ -distributions
- A. Escassut and N. Mainetti -- Morphisms between ultrametric Banach algebras and maximal ideals of finite codimension
- A. Escassut and J. Ojeda -- Survey on branched values and exceptional values for  $p$ -adic meromorphic functions
- H. Glöckner -- Grobman-Hartman theorems for diffeomorphisms of Banach spaces over valued fields
- A. K. Katsaras -- Integral representations of continuous linear maps on  $p$ -adic spaces of continuous functions
- H. A. Keller -- Subfields of valued, complete fields
- A. N. Kochubei -- On some classes of non-Archimedean operator algebras
- H. Maïga and F. Tangara -- Some identities and congruences for Stirling numbers of the second kind
- H. M. Moreno -- Non-measurable sets in the Levi-Civita field
- E. Nagel -- Partial fractional differentiability
- H. Ochsenius and E. Olivos -- A generalized space over a field with a valuation of rank  $\alpha > 0$
- H. Ochsenius and E. Olivos -- A comprehensive survey of non-archimedean analysis in Banach spaces over fields with an infinite rank valuation
- E. Olivos and W. H. Schikhof -- All proper multiplications on the completion of a totally ordered abelian group
- C. Perez-Garcia -- The Grothendieck approximation theory in non-archimedean functional analysis
- K. Shamseddine -- A brief survey of the study of power series and analytic functions on the Levi-Civita fields
- W. Sliwa -- On non-archimedean generalized power series spaces
