ISBN: 9781605352763

The Mind's Machine, introduced in 2012, was written to impart the core concepts of behavioral neuroscience to students in a diverse range of disciplines, including not only psychology and the other life sciences, but art, philosophy, media studies, linguistics, and the like. Through the use of streamlined text, full-color art, novel pedagogical features, and real-life examples and analogies, the book succeeded in engaging students new to neuroscience without sacrificing accuracy.
