Sinopsis

ISBN: 9781442262768

This enlightening new book in the Practical Guides for Librarians series presents the practicalities of developing, implementing, and evaluating use-driven acquisition (UDA) in academic and special libraries, from the multi-dimensional perspectives of collections, acquisitions, and e-resources. Now that UDA is a proven method of collection management being utilized by an array of libraries around the globe, the need for a straightforward, uncomplicated guidebook is more essential than ever.

This book is both a reference source and a guide for current and future librarians. In addition to chapters highlighting e-book, print, and article-level UDA plans, the book will also include considerations for budgeting, interlibrary loan, consortia UDA, ongoing management and assessment strategies, and stimulating future trends. Of special interest are project management cycles detailing each phase and steps of implementing UDA plans, and relevant case studies involving librarians and vendors who have established UDA plans in libraries of various types and sizes
